SUMMARY

QA Engineer with experience in automation, API, mobile, ETL validation, and enterprise application testing across SaaS platforms. Skilled in building scalable automation frameworks using Python, Playwright, Pytest, and Page Object Model (POM). Experienced in AI-assisted QA workflows, performance testing using JMeter, and validating multi-role enterprise applications. Passionate about AI-native quality engineering and delivering reliable, high-quality software products.

CORE SKILLS

Automation Testing: Python, Playwright, Pytest, Page Object Model (POM), UI Automation, Regression Automation

Manual & Functional Testing: Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, UAT, Exploratory Testing, Agile/Scrum Testing

API & Mobile Testing: Postman, API Validation, Android Testing, iOS Testing, APK Testing, Real Device Testing

Performance & Data Validation: JMeter, Load Testing, ETL Validation Testing, Data Integrity Validation

AI & QA Tools: Claude AI, Prompt Engineering Basics, AI-Assisted Testing Workflows, Jira, Xray, Git

Cloud & Platforms: AWS Cloud Practitioner, SaaS Testing, Multi-Tenant Platforms, Agile Methodologies

PRODUCT EXPERIENCE

Arivoo LMS (Multi-Client SaaS Learning Platform)

2025 – Present

Enterprise LMS platform supporting multiple client-specific academic workflows.

- Designed and implemented scalable UI automation frameworks using Python, Playwright, Pytest, and Page Object Model (POM).
- Automated critical workflows across Admin, Teacher, and Student personas, reducing regression execution effort by 60%.
- Performed end-to-end functional, regression, enhancement, and usability testing across multiple client configurations.
- Validated academic modules including attendance, assignments, examinations, grading, reports, and role-based access workflows.
- Collaborated with development teams during Agile sprint cycles for defect validation and release verification.

UAE E-Invoicing Validation Tool

2025

Validation and testing platform for UAE-compliant e-invoicing workflows.

- Worked on ETL validation and automated testing workflows for invoice data processing and compliance validation.
- Performed backend data validation, invoice verification, and rule-based testing using Python-based automation approaches.
- Validated invoice transformation accuracy, data integrity, and error-handling scenarios.

Senco Jewellers 3D Try-On Platform

2025

Performance and load testing for customer-facing virtual try-on experience.

- Conducted load and performance testing using Apache JMeter to evaluate system stability under concurrent user traffic.
- Analyzed response times, throughput, and system behavior during stress scenarios.

Army ERP Workflow System	2025 – Present
Enterprise ERP platform with approval-based workflows and permission-driven modules.	
- Performed functional, UI, workflow, and access validation testing across enterprise modules. - Validated role-based permissions, approval chains, and data consistency scenarios.	

Arivoo Mobile Application (Android & iOS)	2025 – Present
Mobile application integrated with LMS backend services.	
- Performed Android and iOS application testing including compatibility, UI, and functional validation. - Conducted API testing using Postman for backend integration verification.	

PROFESSIONAL EXPERIENCE

Adamas Tech Consulting, Bengaluru, India: QA Engineer (L2A)	August 2025 – Present
- Developed scalable automation frameworks using Python, Playwright, Pytest, and POM architecture for enterprise SaaS applications. - Automated business-critical workflows across Admin, Teacher, and Student personas to improve regression efficiency and release quality. - Performed functional, regression, API, mobile, ETL validation, and performance testing across multiple enterprise platforms. - Executed load testing using Apache JMeter for customer-facing applications and analyzed performance bottle-necks. - Worked on AI-assisted testing workflows and utilized modern productivity tools to improve QA efficiency. - Logged, tracked, validated, and prioritized defects using Jira in Agile sprint environments. - Collaborated closely with developers, business analysts, and stakeholders for requirement clarification and release readiness. - Conducted smoke and post-deployment validation testing for production releases.	

EDUCATION

Bachelor of Technology — Electronics and Communication Engineering	2025 Graduated May 2025
GITAM University, Visakhapatnam	8.25 / 10 GPA

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02)	2026
Foundations of Software Testing and Validation	2025
Google Project Management	2025
Claude 101 – AI Fundamentals	2025
